

Humphrey Canada

Koganei introduces a unique actuator controller!

The iB-Flow assembly uses the first controller in the industry able to provide **Real Time Monitoring** and **Automatic Takt Time Correction** for up to 16 cylinders.

Some of the benefits of this unique product are:

1. Ability to synchronise up to 16 cylinders - System will automatically make corrections to maintain synchronization at any given time and report causes and corrections required.
2. A smoother operation even under conditions of variable pressure or cylinders' sliding resistance.
3. The improvement of the overall takt time by stabilizing cylinders' takt time.
4. The continuous monitoring of information related to cylinders' operating life and cycle time.

Humphrey Automation

is an exclusive importer and master distributor of pneumatic products in the Canadian market.

The company represents major manufacturers of pneumatic products such as Humphrey, Koganei, AirTac, Alpha & Pisco.

With a comprehensive Dealers' network, a large stock and strong technical support, Humphrey Automation can provide all your pneumatic needs.
