**FOR IMMEDIATE RELEASE: Introducing the Humphrey Pilot Valve Series, A10 and A15 Valves
March 21, 2014**

Contact: Mike Hammond, Director of Sales and Marketing (mhammond@humphrey-products.com)

Humphrey is pleased to announce the introduction of the **A10** and **A15** Series “Pilot” Valves.

These miniature direct-acting solenoid valves are perfect as a high value pneumatic interface, linking PLCs and air piloted pneumatic, or process control work valves. We anticipate the A10 and A15 being logical choices for certain engineered solution opportunities, for custom assembly work by your value-added department, or for certain OEMs requiring an affordable solenoid valve interface.

Configured as compact 3-port sub-base mount, Humphrey Pilot Valves feature low power consumption, excellent flow, and non-locking manual override. All valves are shipped CE registered, and RoHS / REACH compliant.

The **A15 Series** (shown actual size at left) is 15mm in width, produces 0.05 Cv flow, power consumption of only 2.5 watts, and is available in standard DC voltages of 12V and 24V. Valves are available normally closed or normally open (to 100psi), electrical entry of lead wire or mini-DIN, including fluorocarbon seals, along with a non-locking override.

The **A10 Series** (at right) is similar but is only 10mm in width, producing 0.01 Cv Flow, power consumption of only 1 watt, and is available in standard DC voltages of 12V and 24V. The A10 is only available normally closed (to 100psi) with a "plug in" style (axial or perpendicular) electrical entry position with a 15" lead wire included.

For more information on Humphrey Pilot Valves, go to www.humphrey-products.com, under the “New Product” menu item. The links for the A10 and A15 have several pages devoted to catalog pdfs, drawings, and technical specifications. Then, use our Online Product Configurator to find product options, list prices, and to download spec sheet PDF and CAD models.

An introductory PowerPoint, prices and lead times are also available on HSIS. Printed A10 and A15 introductory brochures are available now. Initial inventory is in place. **Please order your literature, initial inventory and product samples now.**

Best wishes selling Humphrey Pilot Valves!
